- Free samples available for testing
- Minimum order adapted to industrial buyers
- Sheepskin available in Pickled and Crust stages – ideal for tanneries completing final processing in-house
- Custom cutting service based on client templates – minimize unused leather pieces and reduce production costs

# Special Offer for Tanneries & Leather Goods Manufacturers

## Special Offer for Tanneries

We offer goat and sheepskin leather in the Pickled stage and in the Crust stage at highly competitive prices.

This solution is perfect for tanneries that prefer to complete

## Special Offer for Leather Goods Manufacturers

When purchasing a full hide, a number of unused leather pieces often remain after cutting your patterns, which leads to additional costs. To solve this issue, we offer a different solution:

Send us your product templates, and we will prepare the leather pieces exactly according to your pattern dimensions and in the required quantity.

Benefits of this solution:

- Fewer unused leather pieces (pay only for what you actually use)
- Savings on labor costs
- Reduced machine wear and tear
- Lower energy consumption
- Overall production cost reduction

With this approach, you pay only for the leather you need — with no extra pieces and no hidden costs.

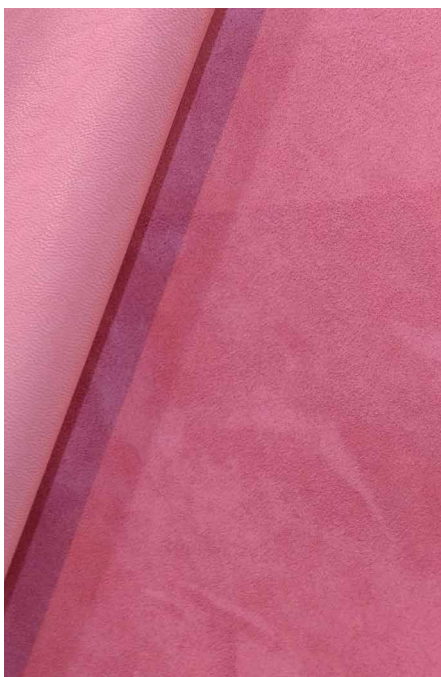

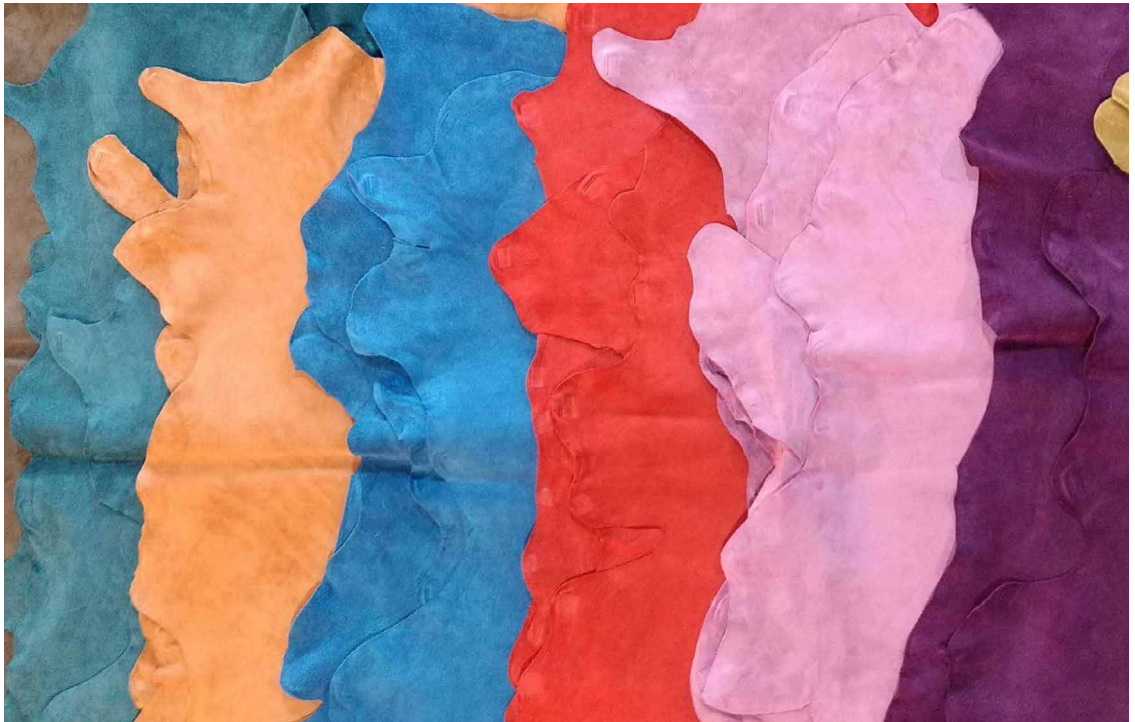

A close-up photograph of brown leather with a pebbled texture, showing deep folds and highlights from warm lighting. The leather is the background for the entire image.

# GOAT LEATHER

# GOAT LEATHER

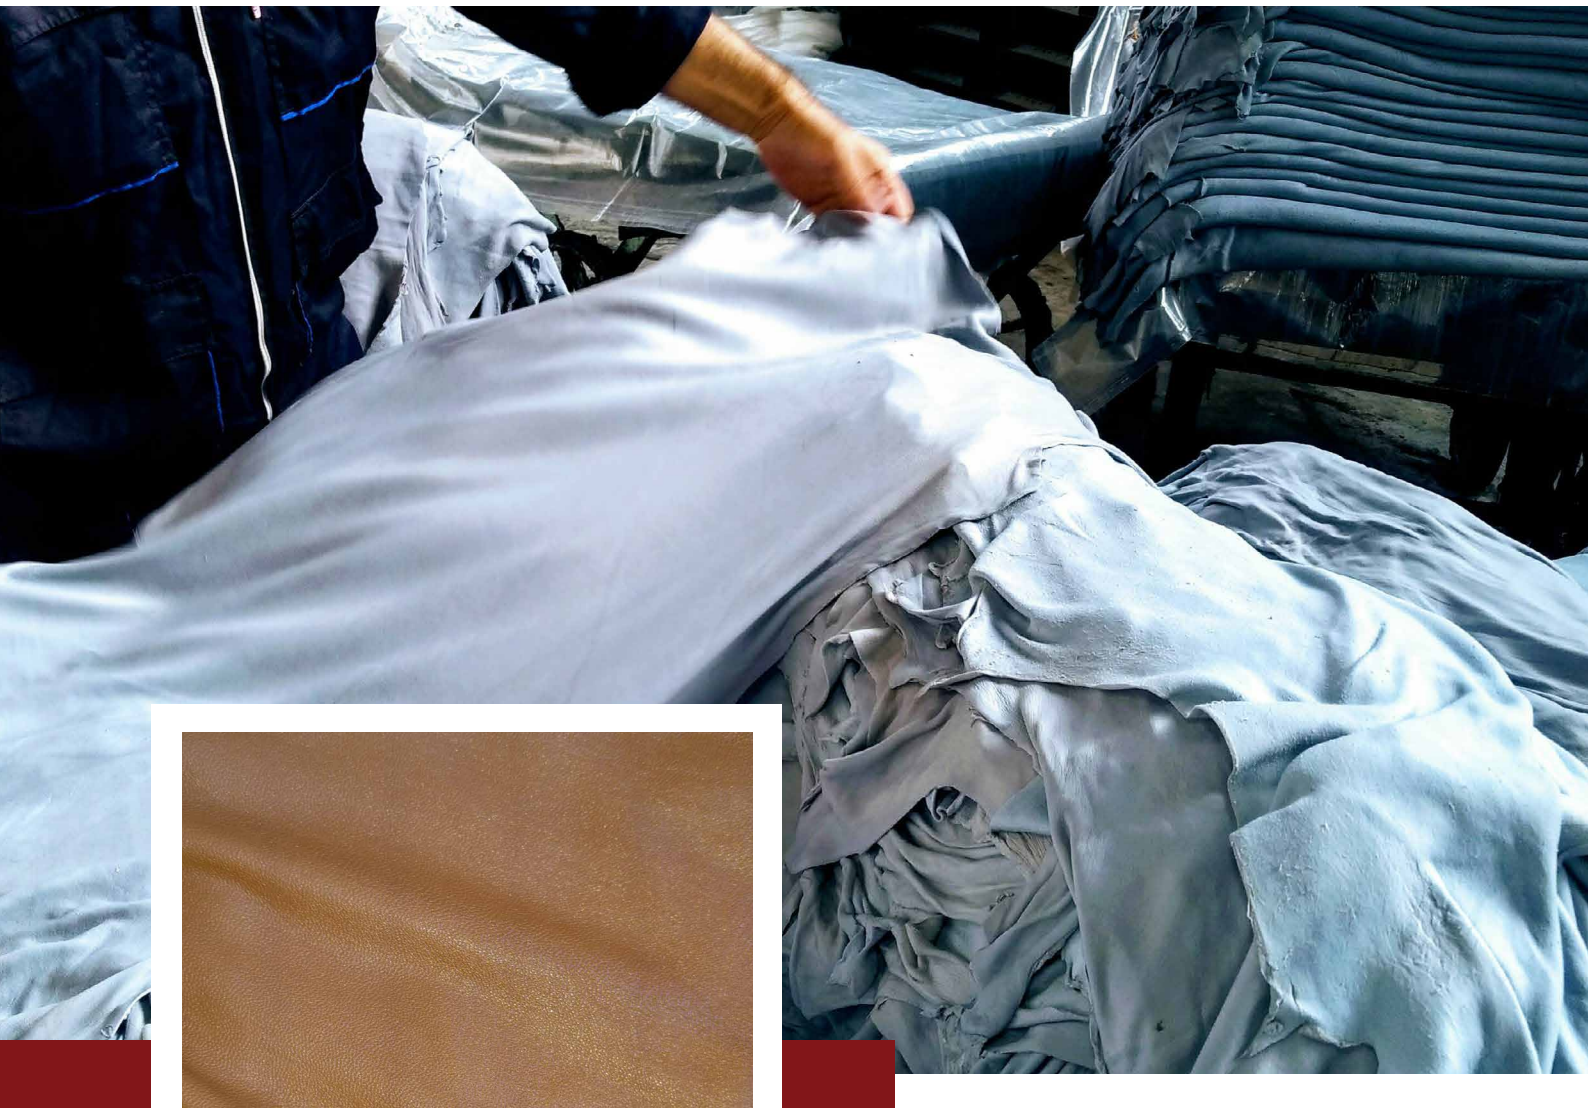

Discover our Goat Leathers >>

Our goat leather stands out for its naturally strong and abrasion-resistant grain. It is produced using premium European raw materials under the supervision of Italian technicians. This ensures a level of quality that matches Italian leather, at a more competitive price.
